\* Impairments such as Asthma, Blood Pressure, and Diabetes, especially for Smokers, will require lower weight than MAX.  
The more severe the Asthma, Blood Pressure, or Diabetes, especially for Smokers, the more the weight will impact the underwriting decision.

Forester: Standard weight table is a guideline for impairments such as Asthma and multiple Blood Pressure meds but is NOT an auto decline if above the Standard Weight.

MoO: If proposed insured is ABOVE the TABLE 2 weight, then it will be an AUTO DECINE.
